EXPERIENCE

Zap, Petah Tikva — *Software Engineer*

May 2022 – Dec 2023

- Skillfully operated within an **Agile** environment as a **FULLSTACK** developer for Zap's **REST** and **DOCTORS** web applications.
- Improving the **Umbraco** system of the site by recreating the **back-end** code and separating the **C# .Net** web system from **Umbraco CMS** and creating new **APIs** for communication between the systems.

TikTk, Kfar Qassem — *Software Engineer*

May 2020 - May 2022

- Led the transformation of a legacy desktop management system to a modern web-based **Angular** application.
- Enhanced data retrieval efficiency from **SQL Server** databases, leading to significant performance improvements.
- Upgraded existing **APIs** to **C# .NET Core**, ensuring better scalability and maintainability.
- Rebuilt the customer-facing **MVC** architecture, resulting in a more robust and user-friendly interface.

Issta, Tel Aviv — *Software Developer*

Jan 2018 - May 2020

- Contributed to an infrastructure development team, leveraging **Agile** methodologies and implementing **OOP** and design patterns.
- Led the development of the **Dynamic Remarketing** project and **Google Tag Manager** utilizing **SOLID** architecture principles to ensure maintainability and scalability in **C#**.
- Developed a new infrastructure for data storage and retrieval from databases and external providers (like **Expedia** and **Amadeus**), applying **OOP design patterns** and **SOLID principles** using **C#** and **VB.Net**.

Taldor, Holon — *Software Developer*

Jan 2015 – Jan 2018

Creating a new **ASP.NET** web system (for the Ministry of Welfare) due to client demand, which included data structure changes, new screens, new reports, and back-end infrastructure changes using **C#** and **MySQL** db.

Hp, Petah Tikva — *Software Developer*

October 2010 – Jan 2015

- Developing the **Manbas System** (Web application for the Education ministry, used by schools in Israel), experience with large scale software and **SQL** db with high quality and secure code.
- **E2E** Developing the **MBB** system from **scratch** alone. Write design specifications that address business requirements, and drive signoff by all stakeholders.
- Development of the backend **APIs** using **C#**, **VB.Net** and **Java**.

Autofont, Netanya — *Backend Developer*

Jun 2007 – October 2010

developing **DLLs** for use by the customer systems, and developed system that integrate hardware (**hp printers**) and software together using **C#**, **C++**, and **XSLT**

EDUCATION

Open University, Israel — *MSC. Computer Science* 2022-2025

Open University, Israel — *BSC. Computer Science* 2014-2016

Ben Gorion University, Israel — *BSC. Physics* 1996-1999

SKILLS

Programming, Algorithms, and Data Structures.

C#

MVC

Java

TypeScript

SQL/RDBMS

Angular

JavaScript

Linux

SQL

Git

REST API

Python

Object-Oriented

HTML

CSS

VB.NET

SOLID Principles

GraphQL

LANGUAGES

Arabic – Native

Hebrew – Fluent

English – Fluent
